EXPERIENCE

Product Manager II at Carta (via Accelex acquisition)

Sep 2025 – Present

- Shipped agentic document acquisition: a Claude plugin that automates portal login, authentication and API-based retrieval of newly issued fund documents
 - Cut document turnaround from over 24 hours (manual) to under 4 hours for large LPs handling 40,000+ documents per year, reducing late and missed documents caused by human error
 - Trained internal operations staff to run the new workflow, driving adoption and embedding the change into day-to-day operations
- Shipped AI-assisted full-stack changes (TypeScript front end, Java back end) behind feature flags

AI Product Manager at Accelex

Mar 2023 – Sep 2025

- Launched a product for LP document collection and management that achieved over \$1m in ARR within 2 years
 - Ran structured discovery, including stakeholder interviews and workflow mapping, translating findings into specifications signed off by clients before build
 - Designed and scaled an AI-driven module for automated document retrieval and classification
 - Used research and production data to prioritise features, inform roadmaps and drive adoption
 - Partnered with UX, data science and engineering teams, scaling the function as market traction grew
 - Led agile sprint ceremonies, aligning delivery with product vision and strategy
- Managed the Accelex integration strategy:
 - Built and led a new integration unit, creating a revenue stream that expanded the product's addressable market
 - Guided technical architecture decisions for client integrations (REST, GraphQL, webhooks)
 - Designed and launched the Accelex public GraphQL API, enabling self-serve client connectivity
- Mentored 2 junior PMs on discovery practices, stakeholder communication and backlog management

Lead Business Analyst / Data Engineer at Accelex

Jan 2022 – Mar 2023

- Delivered data integration projects, automating pipelines between Accelex and client systems using Python (pandas), SQL and AWS Lambda
- Developed new integration capabilities and features that improved data capture accuracy across client portfolios

Data Engineer at IT Venture

Mar 2021 – Dec 2021

- Built ETL pipelines using Python and SQL to migrate data at scale between systems

Technical Business Analyst at Acturis

May 2018 – Mar 2021

- Delivered SaaS for the commercial insurance market, supporting broker workflows to capture risk details, obtain quotes from insurers via e-trade and book policies
- Designed the policy renewals workflow end-to-end
- Maintained database changes and PL/SQL packages (procedures, triggers, optimisations) with version control and code reviews, working across the SDLC (Waterfall)

EDUCATION

MPhys (Hons) Physics (2.1) at the University of Manchester

2013 – 2017

- Entry Scholarship (£1,000) – awarded for A*A*AA grades
- University Water Polo Team Captain
