EXPERIENCE

Product Manager II at Carta (via Accelex acquisition) — *Sep 2025 – Present*

- Drive integration between Accelex's document collection and data intelligence products and Carta's fund administration platform, defining the roadmap for unified LP workflows
- Define the integration strategy for Carta's LPPA product, scoping API, MCP and data connectivity with third-party platforms

AI Product Manager at Accelex — *Mar 2023 – Sep 2025*

- Launched a product for LP document collection and management that achieved over $1m in ARR within 2 years
  - Designed and scaled an AI-driven module for automated document retrieval and classification
  - Used research and production data to prioritize features, inform roadmaps, and drive adoption
  - Partnered with UX, data science, and engineering teams, scaling the function as market traction grew
  - Led agile sprint ceremonies, aligning delivery with product vision and strategy
- Managed the Accelex integration strategy:
  - Built and led a new integration unit, creating a revenue stream that expanded the product's addressable market
  - Guided technical architecture decisions for client integrations (REST, GraphQL, webhooks)
  - Designed and launched the Accelex public GraphQL API, enabling self-serve client connectivity
- Mentored 2 junior PMs on discovery practices, stakeholder communication, and backlog management

Lead Business Analyst / Data Engineer at Accelex — *Jan 2022 – Mar 2023*

- Delivered data integration projects, automating pipelines between Accelex and client systems using Python (pandas), SQL, and AWS Lambda
- Developed new integration capabilities and features that improved data capture accuracy across client portfolios

Data Engineer at IT Venture — *Mar 2021 – Dec 2021*

- Built ETL pipelines using Python and SQL to migrate data at scale between systems

Technical Business Analyst at Acturis — *May 2018 – Mar 2021*

- Delivered database changes (procedures, triggers, optimizations) and maintained PL/SQL packages with version control and code reviews
- Worked across the SDLC (Waterfall), delivering SaaS solutions for insurance premium processing

EDUCATION

MPhys (Hons) Physics (2.1) at the University of Manchester — *2013 – 2017*

- Entry Scholarship (£1,000) – awarded for A*A*AA grades
- University Water Polo Team Captain

PROJECTS

StewardMe – stewardme.ai — *2025*

- Built and deployed an open-source AI assistant that aggregates news feeds with journal-based goal tracking
